

## The Facts

- Every facility in the world is a candidate for Point-of-Use automation to control consumables and assets
- Department heads in every company are under incredible pressure to reduce operating expenses and control costs
- SupplyPro vending offers innovative savings solutions for your operations that can have a proven and significant impact your bottom-line expenses

## The Opportunity

- Trim inventory waste excess, employee stashes and unaccounted inventory by implementing accountability and control via SupplyPro vending strategies

## The Result

- Significant cost savings and increased productivity, managed demand at the Point-of-Use and automated order management

## COMMON VENDING APPLICATIONS

- Cutting Tools
- General MRO
- Personal Protective Equipment
- Maintenance Tools
- Calibrated Instruments
- Indirect Materials
- Abrasives

If you use these materials, chances are there's an opportunity for a SupplyPro Point-of-Use solution that is appropriate to your environment – from moderate to absolute control – *we have the answer.*

## What to Look For and Questions to Ask:

### High Use Materials

- Without control, how much is being lost to hoarding and waste?

### High Dollar Value Items

- How much does it cost to replace a tool?
- How much are you losing on expensive carbide, diamond-tip cutting tools?

### Productivity

- Does your work force have to travel to get “every day” supplies?

### Mission Critical Items

- What does it cost NOT to have the part available?
- How long does it shut down the line?

### “Take Home” Value

- What items are perfect for home use?
- Batteries, Gloves, Safety Glasses
- How much is that costing?

### Unrestricted Access

- Are you outfitting subcontractors for ALL of their contracts – not just yours?
- Are your employees using the right safety materials to prevent injury and workmen's compensation issues?
